

Objective

A career that leverages the skills acquired over the past twenty years as an architect.

Experience

- Responsibilities include all aspects of the design process, management of drawing production, construction observation, strategic planning, budgeting and scheduling.
- Experience in developing design concepts that reinforce programmatic requirements with high aesthetic standards and attention to detail.
- Team oriented philosophy and experience with successful projects large and small, renovation and new construction.
- Ability to work independently and in teams on a broad range of projects, both public and private.
- Experienced in serving as both leader and mentor for multiple team members through the design process while simultaneously managing multiple ongoing projects.
- Responsible for the coordination of outside consultants including: landscape architects, civil, mechanical, electrical, plumbing and structural engineers.
- A proven track record in transforming design concepts into successfully built environments.

The variety of projects I have completed reflects my deep-seated understanding of a broad range of design problems and solutions. These diverse experiences have not only increased my knowledge base, but also provide me with a significant degree of flexibility and adaptability. My experience spans market sectors that include municipal buildings, commercial office space, historic preservation, higher education, laboratories, and health care. Please see attached list of projects completed.

Employers
